COMPLETE POULTRY FEED

Layer Mash

Balanced calcium and phosphorus for steady lay, strong shells and rich yolks.

LIFE STAGE	FEED FORM	BAG SIZE	SHELF LIFE
From point of lay	Mash	[XX] kg	[X] weeks

Typical analysis

NUTRIENT	VALUE
Crude protein (min)	[XX] %
Metabolisable energy	[XX] kcal/kg
Crude fat (min)	[XX] %
Crude fibre (max)	[XX] %
Calcium	[XX] %
Available phosphorus (min)	[XX] %
Lysine (min)	[XX] %
Methionine (min)	[XX] %
Salt (sodium chloride)	[XX] %
Moisture (max)	[XX] %

Typical values on an as-fed basis. Actual values may vary slightly between batches within the declared limits.

Key benefits

- ✓ Supports high, persistent egg production
- ✓ Strong shells, fewer cracks
- ✓ Keeps hens in good condition

Directions for use

1. Feed as the only ration from point of lay (about 5% production) onwards.
2. Not suitable for young pullets: the high calcium level is meant for laying hens only.
3. Provide clean, fresh drinking water at all times.
4. Change from the previous feed gradually over 3 to 5 days.
5. Do not feed feed that is mouldy, wet, caked or smells musty.

Ingredients

[Main ingredients in descending order, e.g. maize, soybean meal, wheat bran, limestone, vitamin and mineral premix.]

Storage

Store bags on pallets in a cool, dry, well-ventilated place, away from direct sunlight, rodents and chemicals. Close opened bags and use the oldest stock first.
